Internship Offer Letter

Student Name : Anubhav Shrijan Mishra
Stream : B.Tech
Branch : B.Tech(Electronics and Communication Engineering)
Institute Name : SRM Institute of Science and Technology, Kattankulathur
Internship Domain : SQL and Database Management Systems
Internship Duration : April 2026 - June 2026
AICTE Student ID : STU65fdcb08d64a51711131400

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Database Foundations & Relational Design	Introduction to database concepts, SQL vs NoSQL systems, environment setup, relational database design, ER modeling, normalization, DDL and basic DML operations (SELECT, INSERT, UPDATE, DELETE).
Week 2	Advanced SQL & NoSQL Fundamentals (MongoDB)	Advanced SQL queries including joins, subqueries, aggregation, GROUP BY/HAVING, introduction to NoSQL concepts, MongoDB document model, and CRUD operations.
Week 3	Data Aggregation, ETL & Power BI Fundamentals	Advanced SQL aggregation, ETL concepts, data transformation techniques, introduction to Power BI interface, data connections, and building basic dashboards and visualizations.
Week 4	Data Modeling & Full-Stack Database Integration (Node.js)	Power BI model view, relationships, basic DAX, performance optimization, integrating databases with full-stack applications using Node.js & Express, PostgreSQL connection, and CRUD API development.
Week 5	Backend APIs & Data Integration (FastAPI)	FastAPI with SQLAlchemy, building RESTful CRUD APIs, API consumption, using requests library, storing API data, and combining multiple datasets.
Week 6	Database Performance, Security & Backup	Performance metrics, indexing strategies, query optimization, configuration tuning, user roles & permissions, SQL injection prevention, backup and recovery strategies.
Week 7	Scalability, High Availability & Real-World Use Cases	Scaling strategies, replication, sharding, clustering concepts, case studies from e-commerce, social media, financial services, and consolidated best practices.
Week 8	Advanced NoSQL & Time Series Modeling & Capstone Project	MongoDB aggregation pipeline, advanced indexing, geospatial queries, time series data modeling, data quality, reproducibility, model validation, and deployment concepts.
Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
